## ABOUT ME

Full-Stack Developer with **6+ years** of experience building scalable web applications and APIs using React.js, Node.js, Laravel, and modern JavaScript frameworks. Experienced in developing production-ready MERN stack applications, integrating third-party APIs, and architecting modular, high-performance systems. Skilled in building responsive frontend experiences, scalable backend services, and cloud-ready applications with a strong focus on clean architecture, performance, and maintainability. Passionate about modern web technologies, microservices, and AI-powered products.

## EDUCATION

Aug. 2016 – Apr. 2019

**Bachelor of Science in Information Technology**

Ludhiana College of Engg. and Technology, Ludhiana, India

## EXPERIENCE

Feb 2020 - Present

**01 Synergy Co.**  
**(Ludhiana)**

**Full Stack Developer & Team Lead**

Over the past **6 years** at 01 Synergy, I have worked on a diverse range of projects including AI-powered platforms, logistics and customs automation systems, SaaS applications, e-commerce platforms, real-time video calling and messaging solutions, browser extensions, PDF/document processing platforms, aggregation platforms, and subscription-based products. I have developed scalable frontend applications, backend microservices, REST APIs, queue-based processing systems, admin dashboards, and cloud-deployed architectures.

I have also worked extensively on third-party integrations, payment gateways, authentication systems, real-time collaboration features, and performance optimization for high-scale production applications.

## SKILLS

- Html, Css & Javascript
- Redux & Redux Toolkit
- RabbitMQ
- Docker
- VPS Host
- TypeScript
- Mysql & PostgreSQL
- SQS & SNS
- AWS Lambda
- Microservices
- React.Js & Next Js
- Mongo DB
- WebSockets
- S3 Buckets
- Git & Github
- Node Js & Express.Js
- Redis & BullMQ
- CI/CD Pipeline
- EC2 & ECS
- Jira & Agile Methodology

## PROJECTS

Klearnow.AI  
Dashboards

[engine.klearnow.com](https://engine.klearnow.com) - [ops.klearnow.com](https://ops.klearnow.com)

Worked as a Full-Stack Developer at [KlearNow.AI](https://KlearNow.AI), building scalable **React.js** dashboards and **Node.js microservices** for logistics and customs automation. Contributed to microfrontend architecture, backend services, performance optimization, and real-time operational workflows while collaborating with distributed Agile teams.

JoinPeel (PEEL)

**JoinPeel (PEEL)**

Worked as a Full Stack Developer on [JoinPeel \(PEEL\)](https://JoinPeel.com), a farm-to-consumer marketplace connecting local farmers with eco-conscious buyers across the USA. Developed scalable frontend features and backend integrations using React, Next.js, Supabase, and TailwindCSS, including geo-based product discovery, Stripe-powered checkout, real-time chat, order tracking, seller profiles, role switching, and admin dashboard functionalities for managing users, listings, payments, and analytics.

Coach AI

### **Coach AI**

Worked as a MERN Stack Developer on Coach AI, an AI-powered business coaching platform focused on professional growth and intelligent workflow automation. Developed scalable React frontends and Node.js backend APIs with MySQL integration, including AI chat functionality, multilingual real-time messaging, chat history management, onboarding flows, marketing pages, blogs, and content management features to deliver a polished production-ready user experience.

Stream Talent

### **Stream Talent**

Worked as a Full Stack Developer on Stream Talent, a recruitment platform connecting candidates with job opportunities and enabling clients to post and manage jobs seamlessly. Built a scalable MVP using React.js and Node.js with a distributed modular monolith architecture, developing robust frontend interfaces, backend services, and reusable modules for better scalability, maintainability, and future platform expansion while ensuring smooth and efficient user interactions.

Trilok Propco

### **Trilok Propco**

Worked as a Full Stack Web Developer on Trilok Propco, a luxury real estate platform focused on residential properties in Kolkata with zero brokerage services. Built scalable frontend and backend systems using React.js, Node.js, Express, and MongoDB, including advanced property search, map-based exploration, property comparison tools, blog management, and JWT-secured admin/user dashboards.

PDFs.com.br

### **PDFs.com.br**

Worked as a Full Stack Developer on PDFs.com.br, a large-scale PDF and document processing platform. Developed scalable frontend modules using Next.js and backend services with Node.js and Express, while implementing Redis-based queues, worker processes, authentication system, document workflows, and performance optimizations to support high-volume document processing and seamless user experience.

Tournated

### **Tournated**

Worked closely with the team at Tournated as a Full Stack Developer, contributing to the development of a scalable sports management platform for tournaments, leagues, rankings, and live scoring. Collaborated on building frontend interfaces, backend services, tournament workflows, live match updates, leaderboards, and organization management features using modern web technologies while ensuring scalability, performance, and smooth user experience across the platform.

Lyallpur Emporium

### **Lyallpur Emporium**

Worked as a Full Stack Developer on Lyallpur Emporium, a full-featured e-commerce platform with secure payment integrations and complete order management workflows. Developed scalable frontend and backend systems using Laravel and MySQL, including product catalogs, shopping cart and checkout flows, user authentication, inventory management, admin dashboards, and responsive user experiences optimized for both desktop and mobile users.

EventHub

### **EventHub**

Worked closely with the team at EventHub as a Full Stack Developer, contributing to the development of an event management and exhibitor platform for live event organizers. Collaborated on building scalable frontend and backend features for exhibitor management, event listings, payments, dashboards, messaging systems, and event workflow automation while ensuring performance, usability, and smooth user experience across the platform.

LibreTemplates

### **LibreTemplates**

Worked as a Full Stack Developer on LibreTemplates, a template marketplace platform focused on digital products and subscription-based services. Developed scalable backend systems and frontend modules using Laravel, PHP, MySQL, and Redis, including authentication, subscription workflows, admin dashboards, template management, dynamic content systems, and multi-language support while ensuring performance, scalability, and smooth user experience across the platform.
